

Ozodbek Usmonqulov

Assistant Teacher | Developer

Summary

Hello, my name is Ozodbek Usmonkulov. Born in 2008, I combined my formal secondary education with a deep passion for software engineering. I am a young Full-Stack developer with 2 years of practical experience in building robust web and mobile applications using Python, Django, JavaScript and React Native. I have technical knowledge, experience in configuring secure databases and working with systems such as local payment gateways (Payme, Click) and automated SMS services. In addition, I have a moderate knowledge of cybersecurity research, OSINT, system vulnerabilities and Linux. Despite my young age, I have started to delve deeper into programming and have more things in order.

- I worked as an assistant teacher in the field of programming, and as an assistant teacher in Backend programming at Zomin IT Park from 2024-2025. My task was to help students who were not familiar with the topics explained. To monitor the code writing process. To help each other if an error was encountered.
- I also studied the field of Promte Engineering in depth. Working with AI artificial intelligence, integrating and creating various programs through them. Creating artificial intelligence to help programmers through AI became one of my next interests.

Experience

Assistant Teacher

Present

Zomin IT Park
Zomin district

I have been working as an Assistant Teacher at the IT Park in Zomin district since 2022. I have worked as an assistant teacher in Backend and Frontend.

Developer

My Practical Startup Project: 'Load UZ'

I developed a real Android startup application 'Load UZ,' developed with a React Native frontend and Python/Django Backend architecture. The project is currently in the advanced stages of integration with well-known services and identification protocols, including MY ID for user verification, and Payme and Click payment systems for secure digital payments.

Education

Full-Stack Development Course
Zomin IT Park
2024 - 2026 Uzbekistan
